

FINAL PROJECT PRESENTATION GUIDELINES

To all students of Integrative Programming:

Please be informed that the **Final Project Presentation** will be conducted during your regular class schedule on **May 18–20, 2026 (Monday–Wednesday)**.

Presentation order will be **random**. All groups are expected to be fully prepared on the first day of presentation regardless of their preferred schedule.

Groups who are not prepared during their assigned/randomly selected presentation time will receive a **ZERO** for both the:

- **Final Project**
- **Final Examination**

Only groups who will successfully present and complete the required demonstration will proceed to the **Online Exhibit**.

Time Allocation Policy

- Each group is strictly given **10 minutes only** for presentation and demonstration.
- Failure to complete within the allotted time will be reflected in the final evaluation.
- **Exceeding the time limit will result in a deduction of 20 points from the final presentation score.**

Required Submission

All required outputs must be submitted on or before the presentation schedule.

Refer to Annex A – Checklist of Final Requirements for the complete list of submission requirements.

Online Exhibit Qualification

Only groups who:

- Successfully present within the allotted time
- Submit all required requirements
- Demonstrate a working and complete system
- Obtain a passing evaluation based on the rubrics

will qualify for the Online Exhibit.

Preparation for Online Exhibit

Qualified groups must prepare a refined and presentation-ready version of their project for public display, including all promotional and presentation materials required for exhibition.

Groups are expected to ensure that their projects are fully functional, presentable, and ready for public viewing during the Online Exhibit.

Please be guided accordingly.

RUBRICS

Criteria	Description	Percentage
<i>Functionality</i>	System features are complete, working, and properly implemented	30%
<i>Integration</i>	Proper integration of programming concepts, database, APIs, and technologies	20%
<i>User Interface & Design</i>	Professional appearance, usability, responsiveness, and user experience	15%
<i>Presentation & Demonstration</i>	Clarity of explanation, confidence, organization, and demonstration flow	15%
<i>Documentation</i>	Completeness and quality of manuscript, source code organization, and technical documentation	10%
<i>Innovation & Creativity</i>	Uniqueness, originality, and practical relevance of the project	10%

Please be informed that the evaluation of the Final Project Presentation will be distributed as follows:

- 60% – Final Project Presentation and Examination
- 20% – Online Exhibit
- 20% – Groupmate Rating (Peer Evaluation)
